// Experience

- Belva**

Lead Frontend React Developer | Bellevue, WA Jan 2024 – Sep 2024

 - Led a team of 3 developers in the full-cycle development of two AI-driven web applications built with React, collaborating directly with the CTO for strategic decision-making.
 - Integrated advanced AI models and Eleven Labs to build virtual agents capable of real-time phone interactions, enhancing user experience and business automation.
 - Developed and deployed a React component generator, integrating GitHub and Monaco code editor, improving developer workflow and efficiency.
- Apple a Day (Seattle Food Bank)**

Full Stack Software Engineer & UX/UI Designer | Remote Jun 2023 – Jan 2024

 - Developed a custom point of sale (POS) system tailored to the specific needs of a Seattle food bank, utilizing modern web technologies such as React, Tailwind CSS, Node.js, and Express.
 - Implemented real-time updates for inventory management, allowing for accurate tracking of stock levels and automated alerts for low-stock items, thereby reducing potential shortages.
 - Implemented version control and code review processes, utilizing tools like Git and conducting regular peer reviews to maintain code quality and foster a collaborative development environment.
- UC Berkeley & University of Washington (edX)**

Web Development Instructional Specialist | Remote Jan 2023 – Jan 2024

 - Developed and facilitated an engaging web development curriculum for 50+ students, resulting in a 95% completion rate and an increase in student satisfaction surveys by 20%.
 - Implemented interactive teaching methods, such as pair programming and group coding projects, resulting in a 30% increase in student engagement during online discussions.
 - Utilized data-driven approaches to track progress and identify areas of improvement for the course curriculum, resulting in a decrease of student dropouts by 10%.
- Maven Group** 

Full Stack Software Engineer & UX/UI Designer | Bellevue, WA Feb 2019 – Jan 2023

 - Designed and built several dozen SPAs, streamlining the digital marketing pipeline and increasing contract wins, adding \$1.4M in additional sales.
 - Transformed UIs using React, modernizing the development process, decreasing debugging time, and improving user experience.
 - Collaborated with cross-functional teams to identify bottlenecks in the development process and implemented new workflows, reducing overall development time 20%.

// Education
